## PERSONAL PROJECTS

Photoshop Automation (09/2021 - 09/2021)
- This project demonstrates the integration of Python programming and Adobe Photoshop for automating text and image processes. By combining the capabilities of both tools, the project streamlines tasks such as personalized graphic generation, consistent text overlay, and automated image editing. The result is an innovative solution that enhances workflow efficiency and produces visually appealing outcomes.

ERP - Agency Soul (07/2023 - Present)
- AgencySoul is aim to help Ecommerce agencies specifically in Pakistan, streamline their operations by providing a central platform to manage clients, projects, inventory, accounting, and human resources. With multi-currency support, our app enables agencies to conduct business globally and seamlessly manage finances across different currencies.

AttendEaze (09/2023 - Present)
- Designed and developed an attendance management application utilizing Flutter for the front-end and Firebase as the backend. The app allows for efficient tracking of attendance in various settings, ensuring real-time data management and secure authentication. Streamlined attendance tracking and reporting, enhancing administrative efficiency.
